Automated Rostering & Shift Fulfilment A smarter way

Many organisations are spending hours manually rostering employees. Others have tried rostering systems that attempt to relieve some of the burden. However, none of these systems are able to automate both rostering *and* shift fulfilment. Finally, there is a better solution that not only helps you create the roster, but fills in the gaps, too!

Aesop is the only automated solution that delivers both Rostering and Shift Fulfilment. So how exactly does it work? Let's take a look:

Step 1: You Build the Roster

Automated rostering means no more paper rosters, sign-up boards, unorganised emails, and hard-to-manage Excel files. Instead, Aesop offers an easy-to-use web portal where you can quickly build, adjust and manage your roster. It's as simple as dragging-and-dropping employees, shifts, position types, time off and more into the roster. Based on the rules you specify to match your facility's requirements, Aesop will validate your roster and notify your employees of their rostered shifts.

Step 2: Aesop Fills the Gaps

Automated shift fulfilment means no more hours of calling and emailing trying to fill gaps in the roster. When you enter open shifts in Aesop, your employees can immediately search for and accept shifts for which they are qualified through the phone, web and text messaging. Aesop increases employee satisfaction by letting employees control their own availability and preferences. Aesop helps managers regain clinical time by saving hours spent rostering and by easily integrating with most payroll systems.

Step 3: Aesop Contacts Your Agencies for Overflow Shifts

Aesop first utilises all the permanent and casual employees at your facility. If you still have unfilled shifts, Aesop will contact your agencies to fill the remaining shifts. In utilising your own employee pool first, Aesop increases consistency of care, reduces labour costs and saves the hassle of hiring and training agency nurses.

Step 4: You Enjoy Reports

Aesop offers the best reporting available, including a library of pre-built reports and an easy drag-and-drop custom report writer. You can track shift fulfilment in real time and report on staffing trends, nurse qualifications, compliance and more.

Aesop is the most advanced rostering technology available, yet it is surprisingly simple to use. Forget about the hours and stress of manual rostering or the rostering systems that only meet half your needs. Aesop allows you to set up customisable business rules to make the system work the way you want it to, whilst you regain the freedom to focus on improving your facility's efficiency, bottom line and clinical care.
