## Intelligent Workforce Management for Nursing Unit Managers

As a NUM, you were hired to be a manager, not a scheduler. The manual rostering process steals hours of your valuable time from the ones you're really there for – your patients.

Aesop is an automated healthcare rostering system that uses the phone, web and SMS to automatically manage your roster and fill open shifts. You can set the roster rules in Aesop to match the requirements of your ward and let Aesop do the work for you, whilst always being able to access the roster in real time.

### Real Challenges

Manual rostering steals hours away from your time with your patients.

- *Spending* hours manually creating and sending out the roster
- *Trying* to attract and retain qualified nurses
- *Dealing* with the stress of training and supervising agency nurses
- *Locating* nurses who are adequately skilled and qualified for each shift
- *Responding* to last-minute or unfilled shift needs
- *Struggling* to pay employees accurately and on time
- *Coordinating* multiple versions of the roster across your organisation

### Real Solutions

Aesop makes rostering easy so you can devote your time to what's important: *your patients*.

- *Create* the roster online and let Aesop fill the gaps via phone, web and SMS
- *Improve* employee satisfaction by letting nurses control their schedules
- *Ensure* that shifts are available to your own employee pool first
- *Match* employees to shifts based on up-to-date skills and certifications
- *View* a constantly updating roster online in real time
- *Integrate* your roster with payroll
- *Eliminate* confusion through one centralised database

### So what can Aesop do for you?

Over 2 million users worldwide have discovered the benefits of automating rostering with Aesop! Call us or visit [www.AesopHealthcare.com.au](http://www.AesopHealthcare.com.au) to find out how Aesop can improve your healthcare organisation's rostering process.
