Aesop[®] *Automated* Healthcare Rostering

Think *Differently*

Aesop's automated healthcare rostering service enables you to:

Track qualifications and training for nurses

Boost employee morale

Save hours entering employee payroll data

Report on compliance

Cut the cost of hiring agency staff

Increase efficiencies with automated healthcare rostering >>

As a DON, you are pulled in a million directions—your supervisors expect you to stay on top of compliance, manage operational costs and report on staffing trends, whilst your NUMs depend on you to support them in providing clinical care and to offer solutions to inefficiencies that slow them down.

Aesop helps you efficiently manage these demands. As the leading automated healthcare rostering system, Aesop uses the phone, web and SMS to automatically fill open shifts in the roster, freeing your NUMs for more clinical time. Aesop offers you real-time reporting on recruitment, compliance, staffing costs and much more.

Real Challenges.

Manual rostering wastes time and hinders efficient ward operations.

- *Lacking the ability to report on staff trends, compliance and more*
- *Losing your NUMs' valuable clinical time trying to attract and retain qualified nurses*
- *Trying to track your nurses' training and qualifications*
- *Wasting time and money reentering data into payroll*
- *Facing the cost of expensive agency nurses*

Real Solutions.

Aesop automates your rostering and expands your management capabilities.

- *Manage ward operations by gaining real-time visibility and reporting*
- *Watch as the roster fills automatically through the phone, web and text messaging*
- *Track qualifications automatically to avoid breaching requirements*
- *Save data entry time and expense by integrating the roster with payroll*
- *Cut staffing agency costs by utilising your own employee pool*
